This diagram shows an exploded perspective view of a portable electronic device assembly. The main component is a circular base or housing (12) which contains various internal components including a display (116), a keypad (114), and several integrated circuits or chips (118, 120, 122, 124, 126, 128, 130, 132, 134, 136). A flexible display or screen (24) is shown being attached to the top of the device. The flexible display (24) includes a frame (56) and a display area (58). A hinge mechanism (60, 62, 64, 66, 68, 70, 72) is used to connect the flexible display to the base. The hinge mechanism includes a pivot point (72) and a locking mechanism (64, 66, 68, 70, 72). The flexible display (24) is shown in a partially folded position, revealing the internal components of the display area (58).

FIG. 10 is a perspective view of a rectangular component 26 with rounded corners. Dimension lines indicate width W and height H.
